Supervisor: Benjamin Busam

Intermediate Presentation

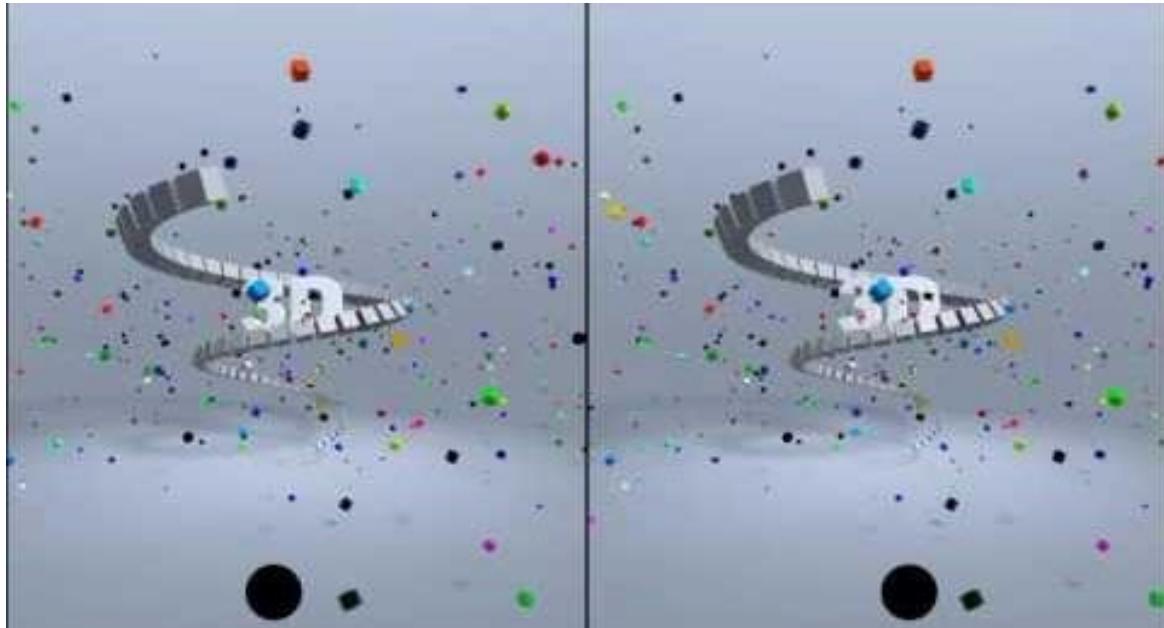

Computer Aided Medical Procedures (CAMP)

Technische Universität München, Germany

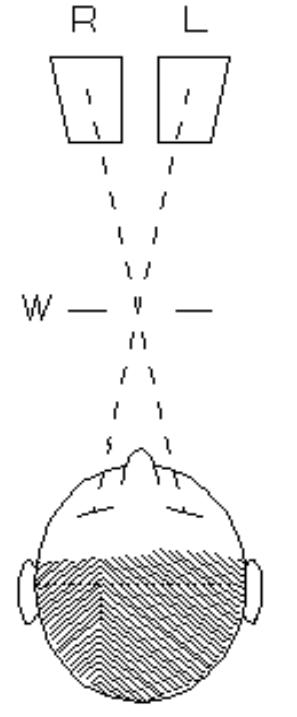

June 29, 2017

## Recap

- Designing and implementing a free-view 2D-3D stereo viewer

3D without glasses Cross Eye [1]

CROSSED  
AXES

Donald Simanek. How to view  
3D without glasses. [2]

- [2] <https://www.lhyp.edu/~dsimanek/3d/view3d.htm> (May 27, 2017)

## Tasks

- Implement a rendering pipeline from a 3D scene to stereo images
- Implement eye tracking algorithm
- Implement GUI
- Testing and Debugging
- Verification and Validation
- Image fusion method evaluation
- Documentation and Report

## Obstacles and Possible Risks

Encountered problems

- PCL compiling from source

Risks

- Eye tracking
- Time

[1]

[2]

- [2] <https://cmake.org/> (June 28, 2017)

## What has been done?

- All necessary libraries compiled and integrated into the project (exception – eye tracking)
- Classes design developed
- Rendering pipeline ready on 90%

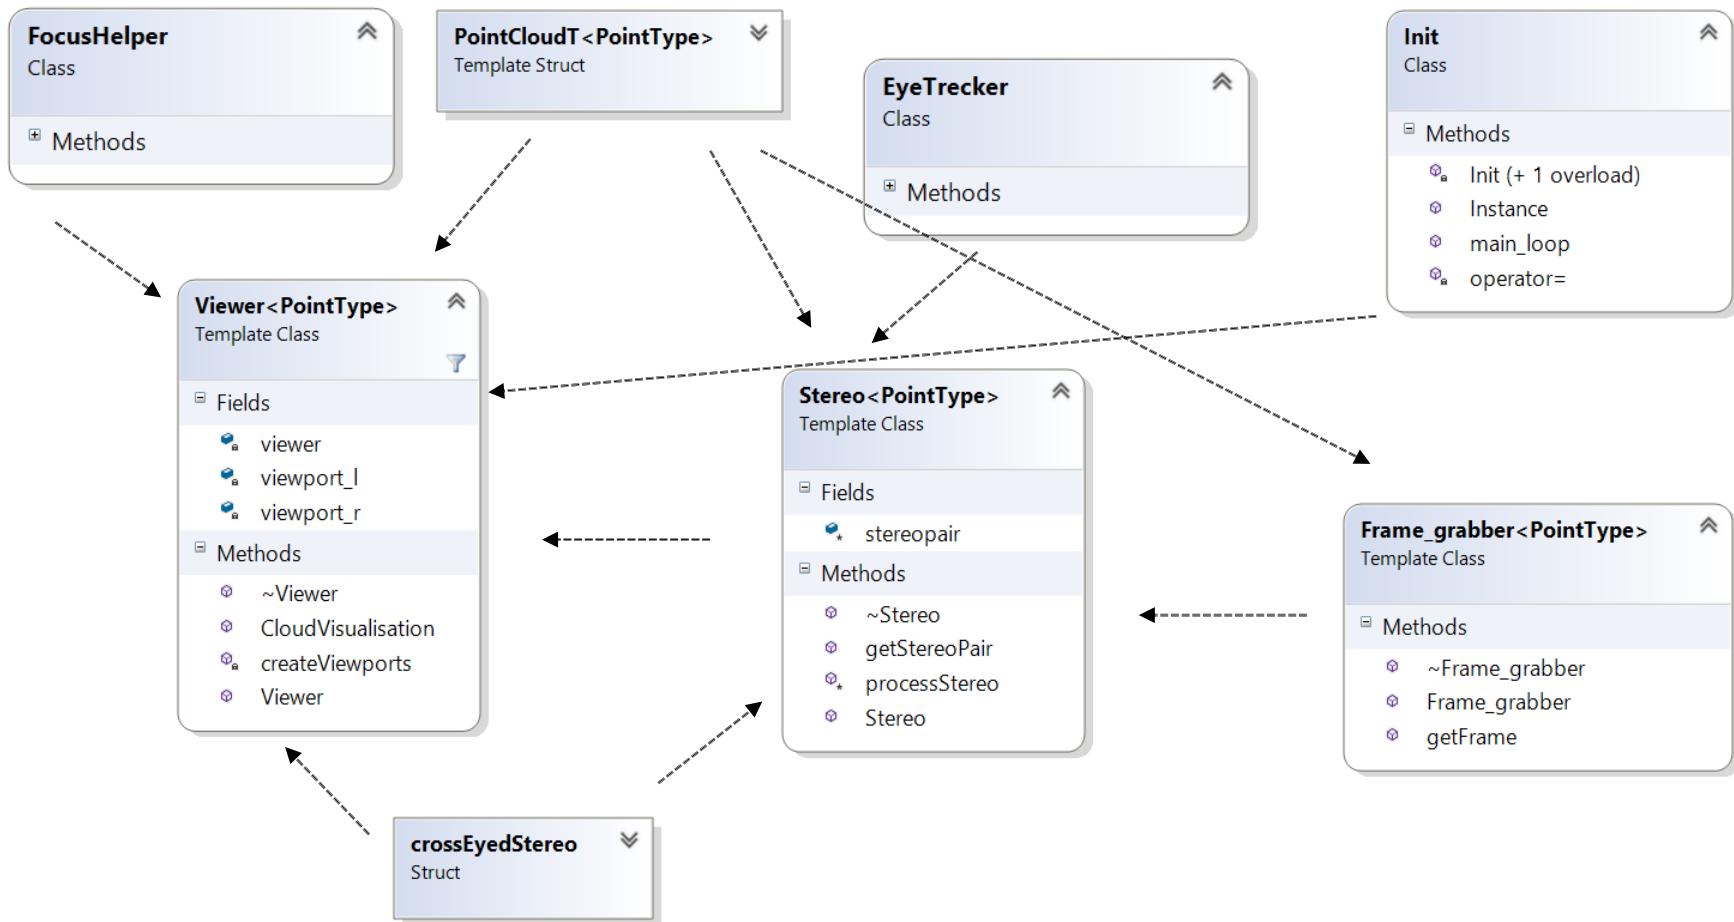

[1]

## What still needs to be done?

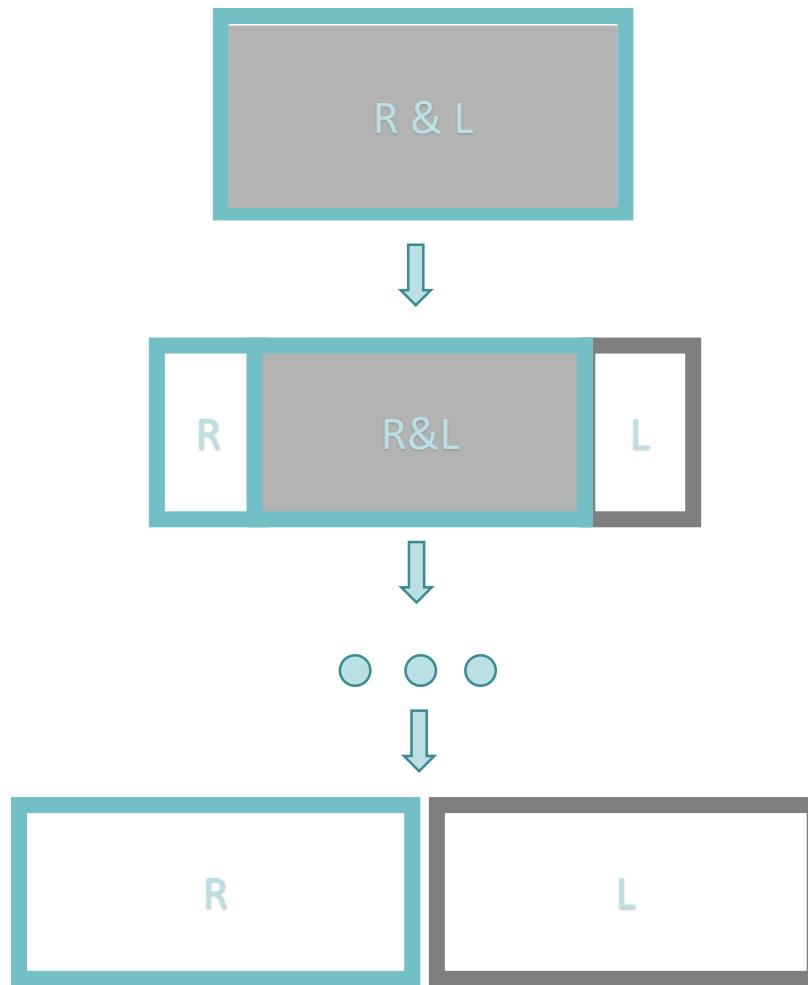

- Implement GUI
- Testing and Debugging
- Verification and Validation
- Image fusion method evaluation
- Documentation and Report
