

The articles in the conference proceedings will be printed “as it is” without make-up and editing.

1. Requirements for page layout.

Articles may contain text, formulas, tables, grayscale images or binary pictures. For photographic images print resolution must be not less than 300 dpi (300 dpi recommended), for vector graphics the lines used must be not less than 0,1 mm thick. Paper format must be A5: 14,8×21,0 cm, with margins: top - 2,0 cm, bottom – 3,0 cm, left – 1,9 cm, right – 1,9 cm. That is, printing field of a page is 11,0×16,0 cm.

There must be no page numbering in articles. The whole numbering will be inserted by the publishers.

The font to be used is Times New Roman with the size of 10 pt. Paragraph first line indention - 0,75 cm. Text alignment – justified. Line interval – 1,0 (single).

The total number of pages for an article must be 2, 3, 4 or 5 pages.

2. Titles must be print in bold, authors and related information – in italics, all centered, see an example.

**A new approach to visualization of ultrasonic tests based
on wavelet image decomposition**

J. Smith¹, D. Brown²

¹ *Munich technical university, e-mail: smith@tum.de*

² *Moscow institute of electronic technology, e-mail: brown@miet.ru*

The specific property of wavelet bases lies in their scalable time-frequency resolution. Such scalability is a necessary tool to be applied for decomposition of non-stationary signals, for example, images of ...

3. Articles must be presented in PDF format. PDF-files must not be locked to let the external page numbering insertion (no other editing is supposed). Formulas must have the same font size of 10 pt as the whole text. For the text used in pictures font size must be not less than 9 pt.
